No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 37

NUMBER 1, FEBRUARY 1988

EDITORIAL NOTES 1

REGULAR ARTICLES

JONATHAN TALBOTT AND JOSEPH JORDAN. A New Microchemical Approach to Amperometric Analysis 5

S. B. SALAMA AND S. A. AWAD. Spectrophotometric Determination of Amounts of Citrate Ion Based on the Reaction with Acid Alizarin Black SN and Zirconium . . . 13

E. KAVLENTIS. Simultaneous Extractive Spectrophotometric Determination of Palladium (II)–Platinum (II) or Palladium (II)–Gold (III) with Benzyltriethylammonium Ion and Iodide in the Presence of EDTA 18

E. KAVLENTIS. Spectrophotometric Determination of Hydroxylamine Using the DPGH–Iron (II)–NH_2OH Ternary Complex 22

SAIED BELAL, AFAF ABOU EL KHEIR, MAGDA AYAD, AND SOBHI EL ADL. Spectrophotometric Determination of Glucose and Fructose in Injections Using Tetracynoethylene Reagent 25

D. AMIN AND B. SHABA. An Application of a Bromine Reagent to the Assay of Sulfa Drugs 30

MIKOŁAJ TARASIEWICZ, WIESŁAWA MISIUK, AND HELENA PUZANOWSKA-TARASIEWICZ. Extractive Spectrophotometric Determination of Niobium (V) with Promazine Hydrochloride 36

R. GUILLÉN SANS AND M. GUZMÁN CHOZAS. Spectrophotometric Evaluation of Ionization Constants of Some Arylidene Thiobarbituric Acids 40

H. N. A. HASSAN, M. E. M. HASSOUNA, AND Y. A. GAWARGIOUS. Simultaneous Microdetermination of Carbon, Hydrogen, and Bismuth in Organobismuth Compounds 51

N. BABER. Some Observations on Using Nematic Liquid Crystals for Optical Microscopy of Chemical Reaction Products on Solid Surfaces 55

WILLIAM J. LONG AND SYANG Y. SU. Evaluation of Polyamide and Crystalline Cellulose as Substrates for Room Temperature Phosphorimetry 59

NASEEM PEERZADA. Determination of Copper(II) in Biological Samples by Anodic-Stripping Voltammetry 65

PATRICK S. M. CAINES, ROGER J. THIBERT, AND THOMAS F. DRAISEY. Determination of Nonenzymatically Glycated Albumin and IgG by Affinity Chromatography and Colorimetry 70

I. M. KHASAWNEH AND J. D. WINEFORDNER. Room-Temperature Phosphorescence Properties of Biphenyl and Some Polychlorinated Biphenyls 77

I. M. KHASAWNEH AND J. D. WINEFORDNER. Room-Temperature Fluorescence and Low-Temperature Phosphorescence Properties of Biphenyl and Some Polychlorinated Biphenyls 86

S. RUBIO-BARROSO, M. GOMEZ-RODRIGUEZ, AND L. M. POLO-DIEZ. Fluorometric Determination of Anionic Surfactants by Extraction as the Rhodamine-B Ion Pair . . 93

G. M. CASTILLO, R. J. THIBERT, N. D. SEUDEAL, AND B. ZAK. Determination of Iron, Copper, and Zinc in a Single Aliquot of Serum Sample Using 4-[(5-Bromo-2-pyridyl)azo]resorcinol. 99

MOUAYED Q. AL-ABACHI, M. S. AL-HAFIDH, AND S. A. RAHIM. Titrimetric Determination of Microgram Amounts of Silver by Thiocyanate Amplification after Precipitation as Silver Hexathiocyanatochromate(III) 110

ABDULRAHMAN S. ATTIYAT, YEHIA A. IBRAHIM, AND GARY D. CHRISTIAN. Study of the Spectrophotometric Measurement of Lithium Using TMC-Crown Formazane . . 114

ABDULRAHMAN S. ATTIYAT, YEHIA A. IBRAHIM, AND GARY D. CHRISTIAN. Potentiometric Selectivity Study of TMC-Crown Formazane Ionophore for Cesium 122

E. KAVLENTIS. Selective Spectrophotometric Determination of Cysteine in the Presence of Cystine, Methionine, and the Remaining Amino Acids Using the Palladium(II)–DPPH Complex 129

SAMUEL NATELSON. Derivatives of the Lactam of α-Guanidinoglutaric Acid (*N*-Amidinopyroglutamic Acid, ApGlu) for Peptide Formation 132

NUMBER 2, APRIL 1988

WALTER S. SELIG. Potentiometric Microdetermination of Potassium, Rubidium, and Cesium with Tetraphenylborate without Separation of Precipitate 141
F. SALINAS, J. C. JIMÉNEZ SÁNCHEZ, AND J. M. LEMUS GALLEGO. Some Observations on the Use of 2-Oximinodimedone Dithiosemicarbazone as a Spectrophotometric Reagent for the Determination of Iodate and Bromate 145
MATTHEW C. GOSNELL AND HORACIO A. MOTTOLA. Determination of Activity and Amount of Silica-Immobilized Penicillinase 149
WALTER S. SELIG. Preliminary Results on a New Potentiometric Method for the Estimation of the Rare Earth Elements. Comments on Other Ions Titratable with Sodium Tetraphenylborate. 155
ALI MOHAMMAD AND NAIM FATIMA. Solid-Phase Color Reaction of *p*-Toluidine and Diphenylamine for the Selective Detection of Some Nitro Compounds 161
S. K. JAIN, B. K. PURI, A. L. SINGLA, AND A. L. J. RAO. Spectrophotometric Determination of Chromium(III) in Steel and Alloys after Extraction of Its *N*-Methylpiperazine-4-carbodithioate into Molten Naphthalene 167
GEORGE W. C. HUNG AND ALBERT Z. HARRIS. The Development of More Sensitive Solvent Systems for Separation of Cholesterol and Low-Molecular-Weight Cholesteryl Esters by Thin-Layer Chromatography 174
SELMAN A. BERGER AND ROBERT ROTHCHILD. The Solvent Extraction of Copper(II), Cobalt (II), and Nickel(II) with Diacetyl-bis-(2-quinolylhydrazone) 181
SULEIMAN ISSA SA'SA', HAMED SUBHI KHALIL, AND IBRAHIM MOHAMMED JALAL. A Kinetic Study of Metronidazole Benzoate Hydrolysis by Reverse-Phase High Performance Liquid Chromatography 190
A. BOTANA LOPEZ, A. GONZALEZ PORTAL, AND F. BERMEJO MARTINÉZ. Spectrophotometric Determination of Bismuth with *N,N'*-Bis(2-hydroxyethyl)glycine 200
KIYOHISA OHTA AND TAKAYUKI MIZUNO. The Effect of Purge Gas in Electrothermal Atomic Absorption Spectrophotometry with a Metal Tube Atomizer 203
G. ABSALAN, A. SAFAVI, AND A. MASSOUMI. Extraction–Atomic Absorption Spectrophotometric Determination of Palladium with 4,6-Diamino-3,5-dicyano-2*H*-1-thiopyran-2-thione 212
P. S. M. CAINES, R. J. THIBERT, AND T. F. DRAISEY. A Fluorometric Coupled Enzymatic Method for the Determination of Succinic Semialdehyde Dehydrogenase in Lymphocytes and Platelets 216
AJAI K. SINGH, BALKRISHNA PURI, AND RAKESH K. RAWLLEY. Atomic Absorption Spectrophotometric Determination of Antimony, Cadmium, and Zinc after Their Preconcentration with Hexamethylenimine Carbodithioate Extraction 221
SULBHA AMLATHE, SWETA UPADHYAY, AND V. K. GUPTA. A Sensitive Spectrophotometric Determination of Traces of Pyridine with Anthranilic Acid in Environmental Samples . . 225
ANTONIA MARIN, MANUEL SILVA, AND DOLORES PEREZ-BENDITO. Some Observations on the Indirect Kinetic Photometric Determination of 8-Quinolinol 231
BOOK REVIEWS
GEORGE W. HARRINGTON. *Electroanalytical Measurements in Flowing Liquids*. By K. Ŝtulík and V. Pacáková 238
PETER N. KELIHER. *New Directions in Chemical Analysis*. Edited by Bernard L. Shapiro 238
ANNOUNCEMENT 240

NUMBER 3, JUNE 1988

J. L. MARTÍNEZ-VIDAL, J. GONZÁLEZ-PARRA, AND F. SALINAS. Extraction–Spectrophotometric Determination of Manganese with 5,5'-Dithiodisalicylhydroxamic Acid (DTDSHA) 241

J. L. Martínez-Vidal, J. González-Parra, and F. Salinas. Extraction–Spectrophotometric Determination of Vanadium with 5,5′-Dithiodisalicylhydroxamic Acid (DTDSHA) 246
E. R. Souaya and W. G. Hanna. Study on the Effect of Size of Lanthanide–Ethylene Glycol-bis(2-aminoethyl ether) Tetraacetate Complexes in the Exchange Reactions with Copper(II) Ions 251
D. Prada, E. Lorenzo, M. Hernández, and L. Hernández. Rapid Determination of Some 1,4-Benzodiazepines by Flow Injection Analysis 257
G. A. Milovanović, M. A. Sekheta, and A. Vassilios. A Novel Kinetic Method for the Determination of Uranium(VI) Based on the Decomposition of Hydrogen Peroxide . . 263
Maciej Jarosz and Miroslav Malát. Spectrophotometric Study of the Formation of Ternary Complexes of Iron(III) with Some Triphenylmethane Dyes and Cationic Surfactants 268
J. Hernández Méndez, O. Jiménez de Blas, and V. Rodríguez Martín. Application of the Formation of the Organophosphorus Palladium Complex: Determination of Malathion by Atomic Absorption Spectrophotometry 275
A. Abdel Razik, F. A. Ali, and F. Abu Attia. Effect of Anion Concentration on the Stability of the Uranyl–Ascorbate Complex 282
Ramadan M. Ramadan and Wagiha H. Mahmoud. Ion-Selective Electrode Determination of Some Halo-Organometallic Compounds 290
Mouayed Q. Al-Abachi and E. S. Salih. Some Observations on an Indirect Atomic Absorption Spectrophotometric Method for the Microdetermination of Chlorine or Bromine in Organic Compounds 293
A. F. Shoukry, Y. M. Issa, R. El-Sheik, and M. Zareh. Plastic Membrane Ion Selective Electrodes for the Determination of Some Anesthetic Compounds 299
Xiang-Rong Liu, Xi-en Shen, and Y. K. Zhang. Observations on the Determination of Oxygen in Silver Halides Using Inductively Coupled Plasma–Atomic Emission Spectrometry 306
M. Ajmal, A. Mohammad, and N. Fatima. Separation of Microgram Quantities of Cadmium(II) from Milligram Quantities of Zinc(II) and of Copper(II) from Nickel(II) and Cobalt(II) with Aqueous Sodium Formate–Halogen Anion Systems 314
Maciej Jarosz and Aleksander Świetłow. Spectrophotometric Determination of Lead with Pyrocatechol Violet and Cationic Surfactants 322
Maria Balcerzak and Włodzimierz Woźniak. Sensitive Flotation–Spectrophotometric Determination of Ruthenium with Tin(II) Chloride and Rhodamine 6G 326
Erkang Wang and Weiying Hou. Determination of Vitamin B_6 Using High-Performance Liquid Chromatography with Electrochemical Detection 338
Samy S. Anis, Mohammed A. Mansour, and Shaker Labib Stefan. Kinetics and Mechanisms of the Oxidation of Oxalic and Malonic Acids by Chromium(VI) in Acidic Sulfate Media 345
Maria Jose Navas, Gustavo G. Gonzalez, and Agustin G. Asuero. Acid–Base Equilibria of Biacetylmonoxime 2-Picolyl-imine 354
John T. McCaffrey and Robert G. Michel. Continuum Source Excited Atomic Fluorescence in the Metastable Nitrogen Plasma 357
G. P. Brotea and R. J. Thibert. Fluorometric Determination of Hydrogen Peroxide Using Resorufin and Peroxidase 368
S. A. Rahim and F. A. Hassan. Indirect Polarographic Microdetermination of Hydrogen Peroxide and Some Inorganic Peroxides Using Amplification Reactions 377
Letter to the Editor
Walter S. Selig. Comments on Potentiometric Titrations with Sodium Nitroprusside 382
Book Reviews
James J. Markham. *Analysis of Surface Waters*. By Hubert Hellman 384
James J. Markham. *Reactions of Acids and Bases in Analytic Chemistry*. By Adam Hulaniciki 384

INFORMATION FOR AUTHORS

The MICROCHEMICAL JOURNAL will invite research papers on all phases of chemistry, including clinical and biochemical, which involve small-scale manipulation. This will include both organic and inorganic work on preparation, purification, separation, detection, determination, trace analysis, and all types of instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person citied as a source of personal communications has approved of the citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Microchemical Journal* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Dr. Peter N. Keliher, Chemistry Department, Villanova University, Villanova, Pennsylvania 19085**. Manuscripts in the area of Bioanalytical Chemistry should be submitted to **Dr. Paul Hemmes, Angenics, Inc., 100 Inman Street, Cambridge, Massachusetts 02139.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. American spelling conventions should be used. At least two copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about 8½ × 11 inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments, and References. Every article should have a definitive title. The use of series numbering is strongly discouraged.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Units of weight, measures, etc. when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm, 5 μg, 3μl).

Names of compounds should agree with those presently in use by Chemical Abstracts.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text: each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced.

All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. This includes the lettering which is reproduced as part of the photoreproduction and is not set in type. (Lettering should be done with a lettering device, such as Leroy.) Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, no larger than 8.5 × 11.5 inches (21 × 27.5 cm). The lettering should be large enough so that when reduced by two-thirds it will still be legible. High quality glossy prints are acceptable. Xerox prints are not acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet: in tables, by superscript letters and placed at bottom of page containing table.

References should be numbered consecutively in order of their citation. The text citations may then

consist of either just the italic number of the reference enclosed in parentheses and set on the text line or of the name (or names) of the author(s) followed by the italic number enclosed in parentheses. In the text citation, if there are more than two authors of a given reference use the surname of the first author followed by "*et al.*," "and co-workers," or "and associates." All authors' names should be included in the reference list itself.

For abbreviations of journal titles in the reference list please follow the forms used in *Chemical Abstracts Service Source Index,* 1985.

Pattern styling, punctuation, and capitalization after these examples, noting the particular style for journal articles, books, and edited (multi-author) books.

1. La Plante, R. J.; Thibert, R. J. *Microchem. J.,* 1985, **31,** 304–317.

2. Allen, R. C. Biochemiexcitation: Chemiluminescence and the study of biological oxygenation reactions. In *Chemical and Biological Generation of Excited States* (W. Adam and G. Alento, Eds.), pp. 61–121. Academic Press, New York, 1982.

3. Vanasse, G. A. *Spectrometric Techniques,* Vol. 3. Academic Press, New York, 1984.

The use of "personal communication" and "unpublished observations" as citations in the text should be avoided.

Proofs will be sent to the authors with reprint order forms. Fifty reprints of each article will be provided free of charge.
